6000 SERIES VERTICAL BLIND

The 6000 Series Vertical Louvre Blind is very simple but **hardwearing system**. The louvre trucks have a **robust construction and have an extended life in high-wear areas**.

The headrail is an attractive extrusion which is slim enough to hide in the top of any reveal and contains the complete running mechanism for the blind. The blind is available with louvre widths in 89mm and 127mm in a wide variety of commercial flame retardant fabrics for every situation.

It comes as standard with the traditional cord operation. As an option, a draw rod can be used to avoid using any cords and chains.

The weights are normally connected with chains but these can be sealed into pockets and the chains removed for vulnerable situations.

For specifications and drawings please visit our website **www.interlaceblinds.com**
