CURTAIN

MIDNIGHT FR™ CURTAIN FABRIC SPECIFICATION

Midnight FR™ is a high quality curtain fabric which offers a blackout quality without the need of adding a second lining. It is inherently flame retardant and continues to meet all required safety standards after washing.

In a range of attractive contemporary colours, it is a favourite for residential projects where a robust and easy to care for finish are needed, at the same time as providing a great level of light block and privacy.

Fabric composition	137cm or 278cm
Weight	300gsm (Black - 240gsm)
Colour	28 Colours
Composition	52% Polyester / 48% Cotton / acrylic back coating
FR standards	M1, B1, BS 5867 Part 2B, IMO FTP Code 2010 part 7, Classe Uno

If you need advice in specifying or have a particular query that we may be able to help with, call the InterLace® sales office on 0800 619 6999 or email your requirements to sales@interlaceblinds.com.

Please note that 90% + blackout can only be achieved when curtains are installed to suit maximum light reduction.

Please note images are only indicative of appearance and performance and fabrics may not appear or perform the same in every situation and should always be tested with samples.

Midnight FR Beige on 9000 Series Curtain

HANDY TIP!

Due to the wide width version available it can be used for floor to ceiling curtains up to 2.5m high with no vertical fabric joins!

FABRIC SAMPLES

Would you like a physical sample of any of these colours? Please call us on 0800 619 6999 and we will be pleased to arrange or visit www.interlace.com/free-sample-request/

Shading Efficiency

TRANSMITTANCE is the amount of light and heat transmitted beyond the fabric. The lower the amount, the greater the efficiency.

BLOCK/REFLECT is the amount of heat and light that is blocked or reflected. The higher the amount, the greater the efficiency.

ABSORPTION is the amount of heat and light absorbed in the fabric. The higher the amount, the lower the efficiency.

ULTRAVIOLET protection illustrates how protective the fabric is in protecting against ultraviolet rays. The higher the amount, the greater the effectiveness.
